the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995. The public sector has also become an important employer of women, with 60% of public sector employees being women in 1995, compared with 55% in 1980.

There are a number of reasons why the public sector has become an important employer of women. One reason is that the public sector has a high proportion of jobs that are traditionally held by women, such as teaching, nursing, and social work. Another reason is that the public sector has a high proportion of jobs that are part-time or flexible, which are more likely to be held by women. A third reason is that the public sector has a high proportion of jobs that are in the service sector, which is also a sector that is traditionally held by women.

The public sector has also become an important employer of women because of the increasing demand for public services. As the population of the UK has increased, so has the demand for public services, such as health care, education, and social care. This has led to an increase in the number of people employed in the public sector, and has also led to an increase in the number of women employed in the public sector.

The public sector has also become an important employer of women because of the increasing demand for flexible working arrangements. As more women have entered the workforce, so has the demand for flexible working arrangements, such as part-time work, flexi-time, and job sharing. The public sector has responded to this demand by offering a range of flexible working arrangements, which has helped to attract and retain more women.

The public sector has also become an important employer of women because of the increasing demand for high-quality public services. As the population of the UK has increased, so has the demand for high-quality public services, such as health care, education, and social care. This has led to an increase in the number of people employed in the public sector, and has also led to an increase in the number of women employed in the public sector.

The public sector has also become an important employer of women because of the increasing demand for public services that are delivered by women. As the population of the UK has increased, so has the demand for public services that are delivered by women, such as health care, education, and social care. This has led to an increase in the number of people employed in the public sector, and has also led to an increase in the number of women employed in the public sector.

The public sector has also become an important employer of women because of the increasing demand for public services that are delivered by women. As the population of the UK has increased, so has the demand for public services that are delivered by women, such as health care, education, and social care. This has led to an increase in the number of people employed in the public sector, and has also led to an increase in the number of women employed in the public sector.
